- A total of 8 years of experience in IT industry and 7+ years of experience in developing, deploying and maintaining web-based applications using PEGA PRPC tool.
- Expertise in BPM Tools like PEGA Infinity, PEGA PRPC 8.x, 7.x.
- Possesses good knowledge on PRPC debugging tools such as Tracer utility, Clipboard and Live UI.
- Have good Knowledge on PRPC rules like
 - Data Model concepts like Data Pages, Data Transform, Property.
 - Decision rules like Decision Table, Decision Tree.
 - Declare rules like Declare Expression, Declare on Change, Declare Trigger, Declare Index.
 - Process rules like Flow, Flow Actions and Validate.
 - Reporting rules like Report Definition.
 - UI Components like Harness and Sections.
 - Integration Connectors rules like Connect-SOAP, Connect-REST.
 - Technical rules like Activity and Circumstance rules.
 - Sysadmin rules like Agents, Database Table and Dynamic System Settings, Extract, Product.
- Good Knowledge on client side and server-side validation, locking mechanisms and data table mapping instance.
- Experience of working in agile methodology.
- Excellent capability to explore, learn and understand newer business domains and technology

EDUCATION DETAILS:

- M. Tech (PE) from JNTU Anantapur, AP, India.
- B. Tech (EEE) from JNTU Anantapur, AP, India.

CERTIFICATIONS:

- Certified PRPC System Architect (CSA).
- Certified PRPC Senior System Architect (CSSA).

PROFESSIONAL EXPERIENCE:

- I am working as **Senior Pega Developer** in **Emscale** IT Services (Formerly Tekone IT Solutions), Hyderabad from **2nd Jun 2025 Jun to till date**
- I worked as **Software Engineer II** in Carelion Global Solutions India LLP formerly (Legato Health Technologies), Hyderabad from **09th Jan 2023 to 28th May 2025**.
- I worked as **Product Development Engineer** in Efficienergi Consulting Private limited Mumbai from **6th May 2018 to 5th Jan 2023**.

TECHNICAL SKILL SET

- BPM Technologies: Pega PRPC 7.x,8.x, PEGA Infinity
- Languages: Shell Scripting, Basics of Java, SQL.
- Operating system: UNIX, Windows.
- Data Base: DB2, Oracle.

PROJECT 1

Client: Elevance Health (Anthem Inc)

2024 Dec – Till date

Application: *Solution Central*

Role: *Senior Pega Developer*

Description: Anthem is one of the nation's leading health benefits companies. Anthem's affiliated health plans are giving consumers greater access to care by working with doctors and healthcare professionals to ensure quality experience. To help deliver these innovative programs, Anthem implemented a next generation service desktop powered by contextual, relevant decisions. Worked on the development of an application With Pega Customer Service, Anthem created Solution Central. The desktop service guides back-office associates through processes, making it easier for them to offer a better, frictionless experience to Anthem's customers. Customer service representatives are given the right content, instructions, and links at the right time, reducing their dependency on training and experience. Solution Central intelligently centralizes and organizes data so that each customer service call is contextual and exceptional

Roles and Responsibilities:

- Design appropriate strategies for converting those requirements into technical functionalities.
- Preparation unit test case, technical specification and review documents.
- Involved in daily Scrum Call, Refinement and Sprint Planning Sessions.
- Worked with Business Analysts and the management team in analyzing and understanding the requirements.
- Developed REST connector to consume data from external systems.
- Assisted production support team in debugging and fixing production incidents.

PROJECT 2

Client: Elevance Health (Anthem Inc)

2023 Jan – 2024 Dec

Application: *ASPEN (Anthem Single Provider Experience Network)*

Role: *Pega Developer*

Description: ASPEN (the Anthem Single Provider Experience Network) is a single desktop application that allows associates to better support our providers by streamlining the functions they assist providers with every day. ASPEN is adaptable and allows us to add new support functions such as pre-authorizations. ASPEN Streamlines your ability to help providers get what they need more efficiently to increase first call resolution and provider satisfaction. The system is designed to provide an improved, more intuitive experience.

Roles and Responsibilities:

- Understanding the business Requirements and Implemented the Business logic by using PEGA PRPC
- Created data modelling rules by manipulating data using Data transforms, Activities, Declare Constraints, Edit input rules.
- Worked on decision rules like Decision Tables When conditions and Decision shapes.
- Implemented Declarative expressions, declare constraints, Declare On change for Automatic Calculation.
- Implemented SLA Conditions by defining the Goal and Deadline activities.
- Defined locking mechanism by configuring Optimistic locking.
- Worked on Routing mechanism using work list, Workbaskets, and custom routing activities.
- Configured Email notification system, Using correspondence, Email integrations.
- Configured file listeners to monitor SFTP Location and pick a file with required data to invoke a new

PROJECT 3

Client: PSL (Power Side)

2018 May – 2023 Jan

Application: Point of Service

Role: Application Developer

Description: This system is designed to issue RMA through the process (workflow) for the customers of PSL (Power side). This application is accessible to PSL Agents. The Service Agents team can work on collecting the inputs from customers and issues the Service requests. This process utilizes most of PRPC rules to implement the application. Application development has completely been developed using PRPC tool. Also, this system would help Agents to generate ad-hoc reports which contain RMA requests raised in each period, start date, end date of service request raised, time taken to complete requests, number of hours spent, ratings information on service and live issues if any etc.

Responsibilities:

- Understanding the business Requirements and Implemented the Business logic by using PEGA PRPC
- Designed and developed the User interface for the application by creating the Sections and Harness.
- Involved in Creation of Requirement Properties, Data Tables and Data Pages
- Developed in Report Definition, Data Transform.
- Developed in When Rule, Decision Table, Decision Tree, Declare Constraints, Declare Expressions, Declare on Change.
- Involved in Creation of validations (Obj-validation, Edit-Validation) rules to implement business logic.
- Developed Activities and Worked with **Tracer** for troubleshooting any issues in Activities.

PERSONAL DETAILS:

Nationality : Indian

Gender : Male

Languages known : English, Telugu, Hindi.
